All-new technology

The Skullcandy Hesh 3 are passable mixed usage wireless headphones that have an excited V-shaped sound profile that won't be for everyone. They have a lightweight design, an easy-to-use control scheme, and a decently comfortable fit, though some may find them a bit tight. This makes them stable enough to take to the gym although they won't be the most breathable headphones. Unfortunately, they don't block out much ambient noise. On the upside, most people should be satisfied with their 19-hour battery life.

Comfort for Your Ears, All Day

These lightweight headphones have ear cushions made of memory foam that creates a seal to isolate outside noise, thereby providing you with a comfortable listening experience. These headphones also come with multi-folding hinges and can be adjusted according to your head-shape.

EASY CONTROLS

Track forward or turn it up. Hesh 3 lets you manage calls, tracks, and volume straight from the ear cup.

Easy to Use, All Day

The voice prompts inform you when these headphones are low on battery and when they have been successfully paired with your device. They also come with on-ear buttons, so you can easily control the volume.

PREMIUM SOUND

PREMIUM SOUND

Memory foam ear cushions and a noise isolating fit meet custom-tuned 40mm drivers for inspiring acoustics. Hesh 3 also packs a digital amp bringing it to a level of best-in-class audio

Only Skullcandy headphones are custom-tuned to deliver music you can feel. From the lyrics in your soul to the bass in your bones.
